Front End Developer

With 4 years of experience as a web developer, I possess a comprehensive skill set and a proven track record of delivering high-quality web solutions. Proficient in HTML, CSS, and JavaScript, I excel at building visually appealing and user-friendly websites that meet client requirements and exceed expectations. My expertise extends to various front-end frameworks, including React and Angular, as well as back-end frameworks including Python and Java, allowing me to develop dynamic and responsive web applications. With a passion for staying up-to-date with the latest industry trends and technologies, I have consistently incorporated emerging tools and practices into my development process. This has allowed me to achieve significant improvements in code maintainability and scalability, reducing code base size by 20% and decreasing development time by 15%.

WORK EXPERIENCE

Arizona State University • Tempe, AZ, USA

Web Designer

- Created and assisted with the development of a Social Media website aimed at musicians looking for collaborations, producers looking for talent, and lyricists looking for singers which acts as a music-focused twitter model with real-time updates.
- Conceptualized, created, and managed dynamic web pages using appropriate technologies in HTML, CSS, and Javascript as well as the back-end program of the system using Python, and Java.
- Worked as part of a 3-person team, providing professional communication and weekly team meetings.

Dexcom Inc. • San Diego, CA, USA

Front End Developer

- Translated designs and wireframes into high quality code using HTML, CSS, and JavaScript.
- Worked closely with developers, designers, and other cross-functional teams to drive innovation and maximize conversions by 40%.
- Ensured the technical feasibility of UI/UX designs.

Hewlett Packard • San Diego, CA, USA

Web Developer Intern

- Actively engaged in web creative design and development as well as assisting in product development that resulted in an improvement in work productivity and on-time deployment of 22%.
- Provided technical support for existing online products and professional customer service, managing 20+ phone and email requests a day.
